

## CMDS Tester™

*Your countermeasures react as a system, so test them as a system.*

### *key features and benefits*

- ◆ Scalable, distributed architecture.
- ◆ Simple Windows® user interface.
- ◆ Provides dummy load for sequencers.
- ◆ Single collector unit powers all testers.
- ◆ Test up to 16 dispensers simultaneously.
- ◆ Easy to setup and analyze.
- ◆ Determine precise firing patterns.
- ◆ Sequencers can poll and fire as if magazines were in the system.

Verify the firing location and time intervals of ALE-40 and ALE-47 programmed Mission Data Files.

Collect firing sequence data for up to 16 dispensers simultaneously. See which dispensers fired, in what order, and the time intervals down to one millisecond.
