

**Your countermeasures react as a system,
so test them as a system.**

CMDS Tester™

Highlights:

- ◆ Easy to setup and analyze.
- ◆ Determine precise firing patterns.
- ◆ Sequencers can poll and fire as if magazines were in the system.
- ◆ Provides dummy load for sequencers.
- ◆ Scalable, distributed architecture.
- ◆ Single collector unit powers all testers.
- ◆ Test up to 16 dispensers simultaneously.
- ◆ Windows® user interface.

Verify the firing location and time intervals of ALE-40 and ALE-47 programmed Mission Data Files.

Collect firing data for up to 16 dispensers simultaneously. See which dispensers fired, in what order, and the time intervals down to one millisecond.
