

FOR IMMEDIATE RELEASE

ITCN receives ISO 9001:2000 Certification

Dayton, OH (April 18, 2006) - ITCN, Inc., a pioneer of time-correlated monitoring for embedded systems, has been certified by NSF International Strategic Registrations, Ltd. to be in conformance with the ISO 9001:2000 standard and has been issued an official Certificate of Registration. The Scope of Registration states: Management, design and manufacture of specialized testing products, components and engineering services to support product development. This is further proof that ITCN is committed to providing useful and cost effective test equipment and tools for the design, integration and maintenance of complex embedded systems and general engineering services to support Customer applications.

NSF-ISR was the evaluator that closely screened the management procedures and overall operations of ITCN. To ensure that the ISO 9001:2000 quality standards are maintained, NSF-ISR will conduct annual audits of the quality and management systems at ITCN.

"The ISO 9001:2000 certification marks an important milestone in ITCN's continual improvement process. This milestone should reassure our long-standing and future customers that we are committed to being a "preferred supplier" of instrumentation solutions." said Roy Penwell, President of ITCN.

ITCN is ISO 9001:2000 Certified.

ITCN provides products and Engineering Services for embedded system monitoring. ITCN has 15 years of experience providing instrumentation for military and commercial programs such as the B-2, C-17, F-15, F-18, P-3, 747, ATLAS, HAWK, and EW systems. Our products have helped major corporations and government organizations around the world save time and money developing complex embedded system applications, while improving product quality.
